**Past performance is no guarantee of future results.** The value of investments and the income from them will vary. Your capital is at risk. Performance data are provided in the share class currency, and include the change in net asset value and the reinvestment of any distributions paid on Portfolio shares for the period shown. Performance data are net of management fees, but do not reflect sales charges or the effect of taxes. Returns for other share classes will vary due to different charges and expenses.

The actual return achieved by investors in other currencies may increase or decrease as a result of currency fluctuations.

Currency-hedged share classes use hedging techniques in an attempt to reduce—but not eliminate—fluctuations between the investor's holdings in a particular currency-hedged share class denominated in the investor's investing currency and the portfolio's base currency. The goal is to deliver returns that track the portfolio's base currency returns more closely.

The Portfolio is a portfolio of AB SICAV I, an open-ended investment company with variable capital (société d'investissement à capital variable) incorporated under the laws of Luxembourg.

1 The MSCI World Health Care Index is a free float-adjusted market capitalization index that is designed to measure global developed market equity performance for the Health Care Sector. The MSCI World Health Care Index consists of 23 developed market country indices. An investor cannot invest directly in an index, and their results are not indicative of the performance for any specific investment, including an AB fund. Indices do not include sales charges or operating expenses associated with an investment in a mutual fund, which would reduce total returns.

2 Life performance is from closest month-end after inception date of Class A. See page 1 for inception dates.

3 Net asset value is denominated in the share class currency.
