What Are the Risks

All Funds are subject to market or currency fluctuations and to the risks inherent in all investments. Therefore, no assurance can be given that the invested capital will be preserved, or that capital appreciation will occur. Since this fund tends to have significant equity holdings in companies in or significantly exposed to frontier markets, the fundamental risk is that frontier markets are smaller, less developed and less liquid countries. Other considerations include economic, political, foreign currency, frontier market, equity, growth stocks and small- and mid-sized company risks. Please consult the Prospectus for a full discussion of these risks.
