Fund benchmark

Standard & Poor's 500 Stock Index

A fund that seeks income and capital appreciation

The fund's investment objective is to seek total return with an emphasis on current income, but also considering capital appreciation, measured in US dollars.

Key Points:

- Combines broad diversification across multiple income-oriented asset classes, active asset allocation, and bottom-up security selection
- Invests primarily in debt securities (corporate and government issues), dividend paying equities, and real estate-related securities
- Uses a flexible, but disciplined approach to active asset allocation

Portfolio structure (%)

- Bonds (66.6)
- Stocks (31.5)
- Cash & Cash Equivalents (4.4)

-2.5% Other. Other consists of: (i) currency derivatives and/or (ii) any derivative offsets.

Net Assets (USD)	150.4 million
Number of Issues	747
Avg. Eff. Maturity	6.7 years
Avg. Eff. Duration	4.7 years

Credit default swap indicies (e.g. CDX, Itraxx) are not rated by ratings agencies and appear in the High Yield Corporate section. Portfolio characteristics are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. The portfolio is actively managed, and current holdings may be different.

Top holdings, portfolio characteristics and weightings do not reflect the effect of exposure/weightings for hedging of hedged share classes. Full holdings and net assets do reflect this hedging.

MFS Meridian Funds from time to time may be registered for sale in other jurisdictions or otherwise offered where registration is not required.

MFS Meridian Funds are not available for sale in the United States or Canada or to US persons.

Growth of a \$10,000 investment over 5 years and 1 year at NAV (%) as of 31-May-20

Fund returns assume the reinvestment of dividends and capital gain distributions but do not include a sales charge. Results would have been less favorable if the sales charge were included. This example is for illustrative purposes only and is not intended to represent the future performance of any MFS product. **Past performance is not a reliable indicator for future results.**

Past performance is not a reliable indicator for future results. All financial investments involve an element of risk. The value of investments may rise and fall so you may get back less than originally invested.

Investors should consider the risks, including lower returns, related to currency movements between their investing currency and the portfolio's base currency, if different.

Other share classes are available for which performance and expenses will differ.

Returns would have been lower had sales charges, of up to 6% of the net asset value (NAV), or any commissions, fees or other charges that your financial intermediary may charge been reflected.

Performance results reflect ongoing charges and any applicable expense subsidies and waivers in effect during the periods shown. All historic results assume the reinvestment of dividends and capital gains.

The source for all fund data is MFS. Source for benchmark performance: SPAR, FactSet Research Systems Inc.

Fund Inception Date: 31 October 2014

^ Results represent the percent change in NAV.

^^ Periods less than one year are actual not annualized.

† Ongoing charges are expressed at an annual rate as a percentage of net assets. They are based on annualized expenses for the most recent six month period available in either January or July. For a Class with less than the full period of data available, or where adjustment is necessary to reflect current charges, the ongoing charges figure is an estimate. Please see the KIID of the relevant Class for the most recent expense information.

¹ Hedged share classes aim to reduce exchange rate and return fluctuations between the applicable non-base currency hedged share class and the unhedged base currency class of the fund. From time to time shareholder transactions in the share class could result in a gain or a loss, which could be significant, in the share class value that is attributable to the adviser's hedging activities rather than to its investment management activities. Other share classes will not share in these gains or losses.

² The class was re-designated as a Hedged Share Class on 22 September 2015; performance shown prior to this date was unhedged and does not reflect the current currency hedging techniques applied to the class.

Class I shares are only available to certain qualifying institutional investors.

Class W shares are available to discretionary portfolio management or independent advisory accounts, clients of financial intermediaries otherwise prohibited from receiving compensation from the Fund, and to employees of MFS and its affiliates.

‡ The Average Credit Quality (ACQR) is a market weighted average (using a linear scale) of securities included in the rating categories. For all securities other than those specifically described below, ratings are assigned to underlying securities utilizing ratings from Moody's, Fitch, and Standard & Poor's rating agencies and applying the following hierarchy: If all three agencies provide a rating, the middle rating (after dropping the highest and lowest ratings) is assigned; if two of the three agencies rate a security, the lower of the two is assigned. Ratings are shown in the S&P and Fitch scale (e.g., AAA). All ratings are subject to change. U.S. Government includes securities issued by the U.S. Department of the Treasury. Federal Agencies includes rated and unrated U.S. Agency fixed-income securities, U.S. Agency MBS, and CMOs of U.S. Agency MBS. Other Not Rated includes fixed income securities which have not been rated by any rating agency. The portfolio itself has not been rated.

TRAILING 3-YEAR RISK MEASURES VS. BENCHMARK (A2USD)

Standard Deviation 9.02 vs. 16.94

Standard Deviation is an indicator of the portfolio's total return volatility, which is based on a minimum of 36 monthly returns. The larger the portfolio's standard deviation, the greater the portfolio's volatility.

RISK AND REWARD PROFILE CLASS (A2USD)

◀ Lower Risk (typically lower rewards)				Higher Risk ▶ (typically higher rewards)			
1	2	3	4	5	6	7	

The rating is based on past volatility of returns and may be different in the future or for other classes of the fund.

See the fund's offering documents for more details, including information on fund risks and expenses.

The offering documents (sales prospectus and Key Investor Information Documents (KIIDs)), articles of incorporation and financial reports are available to investors at no cost in paper form or electronically at meridian.mfs.com, at the offices of the paying agent or representative in each jurisdiction or from your financial intermediary. KIIDs are available in the following languages; Danish, Dutch, English, French, German, Italian, Norwegian, Portuguese, Spanish, and Swedish. The sales prospectus and other documents are available in English. For additional information, call 416.506.8418 in Toronto or 352.464.010.600 in Luxembourg or your local paying agent or representative. **Ireland:** Bridge Consulting Limited, 33 Sir John Rogerson's Quay, Dublin 2, Ireland. Tel: +353 (0)1-631-6444 **United Kingdom:** Facilities Agent: MFS International (UK) Ltd., One Carter Lane, London, EC4V 5ER UK. Tel: 44.(0)20.7429.7200.

MFS Meridian Funds is an investment company with a variable capital established under Luxembourg law. MFS Investment Management Company (Lux) S.à.r.l. is the management company of the Funds, having its registered office at 4, Rue Albert Borschette, L-1246, Luxembourg, Grand Duchy of Luxembourg (Company No. B.76.467). The Management Company and the Funds have been duly authorised by the CSSF (Commission de Surveillance du Secteur Financier) in Luxembourg.

MFS Meridian Funds are recognised under Section 264 of the Financial Services and Markets Act of 2000 (reference number 435996) and U.K. investors should note that holdings of shares in the funds will not be covered by the provisions of the Financial Services Compensation Scheme, or by any similar scheme in Luxembourg.

Important risk considerations

The fund may not achieve its objective and/or you could lose money on your investment in the fund. ■ **Stock:** Stock markets and investments in individual stocks are volatile and can decline significantly in response to or investor perception of, issuer, market, economic, industry, political, regulatory, geopolitical, and other conditions. ■ **Bond:** Investments in debt instruments may decline in value as the result of, or perception of, declines in the credit quality of the issuer, borrower, counterparty, or other entity responsible for payment, underlying collateral, or changes in economic, political, issuer-specific, or other conditions. Certain types of debt instruments can be more sensitive to these factors and therefore more volatile. In addition, debt instruments entail interest rate risk (as interest rates rise, prices usually fall). Therefore, the portfolio's value may decline during rising rates. Portfolios that consist of debt instruments with longer durations are generally more sensitive to a rise in interest rates than those with shorter durations. At times, and particularly during periods of market turmoil, all or a large portion of segments of the market may not have an active trading market. As a result, it may be difficult to value these investments and it may not be possible to sell a particular investment or type of investment at any particular time or at an acceptable price. The price of an instrument trading at a negative interest rate responds to interest rate changes like other debt instruments; however, an instrument purchased at a negative interest rate is expected to produce a negative return if held to maturity. ■ **Emerging Markets:** Emerging markets can have less market structure, depth, and regulatory, custodial or operational oversight and greater political, social, geopolitical and economic instability than developed markets. ■ **Derivatives:** Investments in derivatives can be used to take both long and short positions, be highly volatile, involve leverage (which can magnify losses), and involve risks in addition to the risks of the underlying indicator(s) on which the derivative is based, such as counterparty and liquidity risk. ■ **High Yield:** Investments in below investment grade quality debt instruments can be more volatile and have greater risk of default, or already be in default, than higher-quality debt instruments. ■ **Mortgage-backed:** Mortgage-backed securities can be subject to prepayment and/or extension and therefore can offer less potential for gains and greater potential for loss. ■ **Real Estate:** Real estate-related investments can be volatile because of general, regional, and local economic conditions, fluctuations in interest rates and property tax rates; shifts in zoning laws, environmental regulation and other governmental actions; increased operation expenses; lack of availability of mortgage funds; losses due to natural disasters; changes in property values and rental rates; overbuilding; losses due to casualty or condemnation, cash flows; the management skill and creditworthiness of the REIT manager, and other factors. ■ Please see the prospectus for further information on these and other risk considerations.

Benchmark and vendor disclosures

Standard & Poor's 500 Stock Index - a market capitalization-weighted index of 500 widely held equity securities, designed to measure broad U.S. equity performance.

The MFS Meridian Diversified Income Fund Blended Index is comprised of the following: 1) Bloomberg Barclays U.S. High-Yield Corporate Bond 2% Issuer Capped Index (25%) - a market capitalization-weighted index that measures the performance of non-investment grade, fixed rate debt. Eurobonds and debt issues from countries designated as emerging markets (e.g., Argentina, Brazil, Venezuela, etc.) are excluded. 2) Bloomberg Barclays U.S. Government/Mortgage Bond Index (20%) - measures debt issued by the U.S. Government, and its agencies, as well as mortgage-backed pass-through securities of Ginnie Mae (GNMA), Fannie Mae (FNMA), and Freddie Mac (FHLMC). 3) JPMorgan Emerging Markets Bond Index Global (15%) - measures the performance of U.S.-dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities: Brady bonds, loans, Eurobonds. 4) Morgan Stanley Capital International (MSCI) US REIT Index (net div) (20%) - a market capitalization-weighted index that is designed to measure equity market performance for real estate investment trusts (REITs) that generate a majority of their revenue and income from real estate rental and leasing operations. 5) Morgan Stanley Capital International (MSCI) All Country World (ACWI) High Dividend Yield Index (net div) (20%) - is designed to reflect the performance of developed and emerging markets equities with higher-than-average dividend income and quality characteristics. It is not possible to invest directly in an index.
