

MFS Meridian® Funds

Emerging Markets Debt Fund

31 JULY 2017

A diversified global emerging market bond fund

The fund's investment objective is to seek total return, measured in US dollars.

Key points:

- Focuses primarily on sovereign/quasi-sovereign U.S. dollar-denominated emerging markets debt
- Research-intensive approach focuses on outperformance through alpha, with an emphasis on managing downside risk, in a conservative fashion
- Focuses on providing strong risk-adjusted returns and a favorable information ratio

PORTFOLIO MANAGEMENT

Matthew W. Ryan

30 years in industry

Ward Brown

21 years in industry

Portfolio characteristics data are based on the equivalent exposure of unaudited net assets as of 31-Jul-17. Equivalent exposure measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. The portfolio is actively managed, and current holdings may be different.

Top ten holdings, portfolio characteristics and weightings do not reflect the effect of exposure/weightings for hedging of hedged share classes. Full holdings and net assets do reflect this hedging.

PORTFOLIO STRUCTURE

Other consists of: (i) currency derivatives and/or (ii) any derivative offsets.

Other share classes are available for which performance and expenses will differ.

The source for all fund data is MFS. Source: Benchmark performance from SPAR, FactSet Research Systems Inc.

Fund inception date: 01 October 2002

^ Results represent the percent change in NAV.

^^ Periods less than one year are actual not annualized.

1 The MFS Meridian Funds offer several share classes each with different expenses. Performance reflects the performance of a relevant older class with the same currency until the actual start of class performance record of the class detailed. Performance for periods prior to that date may have been higher or lower had the actual share class fees and expenses been reflected.

2 Hedged share classes aim to reduce exchange rate and return fluctuations between the applicable non-base currency hedged share class and the unhedged base currency class of the fund. From time to time shareholder transactions in the share class could result in a gain or a loss, which could be significant, in the share class value that is attributable to the adviser's hedging activities rather than to its investment management activities. Other share classes will not share in these gains or losses.

3 Unlike other share classes, the Gross Income Share Class pays income before the expenses attributable to the share class have been deducted. This has the effect of increasing the amount of income paid and therefore the distribution rate will be higher than the Income Share Class. However, expenses will be deducted from the fund's capital gains and/or capital which may cause your principal value to be less than your original investment. Investors should discuss the suitability of this share class with their tax or financial advisor.

Returns would have been lower had sales charges, of up to 6% of the net asset value (NAV), or any commissions, fees or other charges that your financial intermediary may charge been reflected.

Class I shares are only available to certain qualifying institutional investors.

JPMorgan Emerging Markets Bond Index Global tracks debt instruments in the emerging markets (includes a broader array of countries than the EMBI Plus).

It is not possible to invest directly in an index.

| CREDIT QUALITY (% OF TOTAL NET ASSETS) | | | | | | | | | |
|--|------------------|-----|------|-----|------|------|------|-------------|-----------------|
| US GOVT | FEDERAL AGENCIES | AAA | AA* | A | BBB | BB | B | CCC & BELOW | OTHER NOT RATED |
| 0.2 | — | — | -0.1 | 7.7 | 30.4 | 25.8 | 21.7 | 3.7 | 2.7 |

Avg. credit quality: BB

The Average Credit Quality (ACQR) is a market weighted average (using a linear scale) of securities included in the rating categories. For all securities other than those specifically described below, ratings are assigned to underlying securities utilizing ratings from Moody's, Fitch, and Standard & Poor's rating agencies and applying the following hierarchy: If all three agencies provide a rating, the middle rating (after dropping the highest and lowest ratings) is assigned; if two of the three agencies rate a security, the lower of the two is assigned. Ratings are shown in the S&P and Fitch scale (e.g., AAA). All ratings are subject to change. U.S. Government includes securities issued by the U.S. Department of the Treasury. Federal Agencies includes rated and unrated U.S. Agency fixed-income securities, U.S. Agency MBS, and CMOs of U.S. Agency MBS. Other Not Rated includes fixed income securities which have not been rated by any rating agency. The portfolio itself has not been rated.

| TRAILING 3 YR RISK MEASURES VS. BENCHMARK (A2USD) | |
|---|--------------|
| Standard Deviation | 5.59 vs 6.04 |

Standard deviation is an indicator of the portfolio's total return volatility, which is based on a minimum of 36 monthly returns. The larger the portfolio's standard deviation, the greater the portfolio's volatility.

Performance results reflect ongoing charges and any applicable expense subsidies and waivers in effect during the periods shown. All historic results assume the reinvestment of dividends and capital gains.

Past performance is not a reliable indicator for future results. All financial investments involve an element of risk. The value of investments may rise and fall so you may get back less than originally invested.

Investors should consider the risks, including lower returns, related to currency movements between their investing currency and the fund's base currency, if different.

See the fund's offering documents for more details, including information on fund risks and expenses.

The offering documents (sales prospectus and Key Investor Information Documents (KIIDs)), articles of incorporation and financial reports are available to investors at no cost in paper form or electronically at meridian.mfs.com, at the offices of the paying agent or representative in each jurisdiction or from your financial intermediary. KIIDs are available in the following languages: Danish, Dutch, English, French, German, Italian, Norwegian, Portuguese, Spanish and Swedish. The sales prospectus and other documents are available in English. For additional information, call 416.506.8418 in Toronto or 352.464.010.600 in Luxembourg or your local paying agent or representative. **Spain:** A complete list of the MFS Meridian SICAV fund distributors in Spain is available on the CNMV Website (www.cnmv.es) MFS Meridian Funds is an investment company with a variable capital established under Luxembourg law. MFS Investment Management Company (Lux) S.à.r.l. is the management company of the Funds, having its registered office at 35, Boulevard du Prince Henri, L-1724, Luxembourg, Grand Duchy of Luxembourg (Company No. B.76.467). The Management Company and the Funds have been duly authorised by the CSSF (Commission de Surveillance du Secteur Financier) in Luxembourg.

CNMV's registration number for Spain — 68.

IMPORTANT RISK CONSIDERATIONS

The fund may not achieve its objective and/or you could lose money on your investment in the fund. Investments in debt instruments may decline in value as the result of declines in the credit quality of the issuer, borrower, counterparty, or other entity responsible for payment, underlying collateral, or changes in economic, political, issuer-specific, or other conditions. Certain types of debt instruments can be more sensitive to these factors and therefore more volatile. In addition, debt instruments entail interest rate risk (as interest rates rise, prices usually fall), therefore the Fund's share price may decline during rising rates. Funds that consist of debt instruments with longer durations are generally more sensitive to a rise in interest rates than those with shorter durations. At times, and particularly during periods of market turmoil, all or a large portion of segments of the market may not have an active trading market. As a result, it may be difficult to value these investments and it may not be possible to sell a particular investment or type of investment at any particular time or at an acceptable price. The price of an instrument trading at a negative interest rate responds to interest rate changes like other debt instruments; however, an instrument purchased at a negative interest rate is expected to produce a negative return if held to maturity. Emerging markets can have less market structure, depth, and regulatory, custodial or operational oversight and greater political, social, and economic instability than developed markets. Investments in derivatives can be used to take both long and short positions, be highly volatile, involve leverage (which can magnify losses), and involve risks in addition to the risks of the underlying indicator(s) on which the derivative is based, such as counterparty and liquidity risk. Investments in below investment grade quality debt instruments can be more volatile and have greater risk of default, or already be in default, than higher-quality debt instruments.

Please see the prospectus for further information on these and other risk considerations.

RISK AND REWARD PROFILE CLASS A2USD
