

# MFS Meridian® Funds

## U.S. Value Fund

31 OCTOBER 2017

### A traditional value fund investing in high-quality companies

The fund's investment objective is to seek capital appreciation, measured in US dollars.

Key points:

- Traditional U.S. value fund investing primarily in large cap companies that we believe are high quality
- Seeks undervalued, high-quality companies with characteristics such as low price-to-earnings ratios or high dividend yields
- Our valuation approach is flexible, but we place a strong emphasis on cash flow and returns-based methodologies.

#### PORTFOLIO MANAGEMENT

##### Nevin P. Chitkara

24 years in industry

##### Steven R. Gorham

27 years in industry

##### Katrina Mead\*\*

22 years in industry

\*\* Advises and communicates on the management of the portfolio, but is not responsible for day-to-day management.

Portfolio characteristics data are based on the equivalent exposure of unaudited net assets as of 31-Oct-17. Equivalent exposure measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. The portfolio is actively managed, and current holdings may be different.

Top ten holdings, portfolio characteristics and weightings do not reflect the effect of exposure/weightings for hedging of hedged share classes. Full holdings and net assets do reflect this hedging.

#### PORTFOLIO STRUCTURE

Other consists of: (i) currency derivatives and/or (ii) any derivative offsets.

^ Results represent the percent change in NAV.

^^ Periods less than one year are actual not annualized.

† Ongoing charges are expressed at an annual rate as a percentage of net assets. They are based on annualized expenses for the six months ended 31 July 2016. For a Class with less than the full period of data available, or where adjustment is necessary to reflect current charges, the ongoing charges figure is an estimate. Please see the KIID of the relevant Class for the most recent expense information.

1 Hedged share classes aim to reduce exchange rate and return fluctuations between the applicable non-base currency hedged share class and the unhedged base currency class of the fund. From time to time shareholder transactions in the share class could result in a gain or a loss, which could be significant, in the share class value that is attributable to the adviser's hedging activities rather than to its investment management activities. Other share classes will not share in these gains or losses.

**Returns would have been lower had sales charges, of up to 6% of the net asset value (NAV), or any commissions, fees or other charges that your financial intermediary may charge been reflected.**

Class I shares are only available to certain qualifying institutional investors.

Russell 1000® Value Index measures large-cap U.S. value stocks.

Standard & Poor's 500 Stock Index measures the broad U.S. stock market.

It is not possible to invest directly in an index.

**TRAILING 3 YR RISK MEASURES VS. BENCHMARK (A1USD)**

**Beta** 0.97

**Standard Deviation** 10.26 vs 10.27

**Beta** is a measure of the volatility of a portfolio relative to the overall market. A beta less than 1.0 indicates lower risk than the market; a beta greater than 1.0 indicates higher risk than the market. It is most reliable as a risk measure when the return fluctuations of the portfolio are highly correlated with the return fluctuations of the index chosen to represent the market.

**Standard deviation** is an indicator of the portfolio's total return volatility, which is based on a minimum of 36 monthly returns. The larger the portfolio's standard deviation, the greater the portfolio's volatility.

Performance results reflect ongoing charges and any applicable expense subsidies and waivers in effect during the periods shown. All historic results assume the reinvestment of dividends and capital gains.

**Past performance is not a reliable indicator for future results. All financial investments involve an element of risk. The value of investments may rise and fall so you may get back less than originally invested.**

Investors should consider the risks, including lower returns, related to currency movements between their investing currency and the fund's base currency, if different.

**See the fund's offering documents for more details, including information on fund risks and expenses.**

The offering documents (sales prospectus and Key Investor Information Documents (KIIDs)), articles of incorporation and financial reports are available to investors at no cost in paper form or electronically at meridian.mfs.com, at the offices of the paying agent or representative in each jurisdiction or from your financial intermediary. KIIDs are available in the following languages; Danish, Dutch, English, French, German, Italian, Norwegian, Portuguese, Spanish and Swedish. The sales prospectus and other documents are available in English. **IMPORTANT RISK CONSIDERATIONS**

The fund may not achieve its objective and/or you could lose money on your investment in the fund. Stock markets and investments in individual stocks are volatile and can decline significantly in response to issuer, market, economic, industry, political, regulatory, geopolitical, and other conditions. Investments in value companies can continue to be undervalued for long periods of time, not realize their expected value, and be more volatile than the stock market in general. Because the portfolio may invest a substantial amount of its assets in issuers located in a single country or in a limited number of countries, it may be more volatile than a portfolio that is more geographically diversified. Please see the prospectus for further information on these and other risk considerations.
