Investment overview

OBJECTIVE

To increase the value of your investment.

PORTFOLIO ASSETS

The Compartment mainly invests in equities of companies that are domiciled, or do most of their business, in Russia.

INVESTMENT PROCESS

In actively managing the Compartment, the

investment manager uses a combination of market and fundamental company analysis to select securities that it believes offer favourable growth prospects at a reasonable price. The Compartment is designed to offer performance that is likely to be significantly different from that of the benchmark.

Risk considerations

The Share Class is assigned to this risk category because of the price variations resulting from its currency and the nature of the Compartment's investments and strategy. The risk category shown is based on historical data and may not be a reliable indication for the future risk profile of the Share Class. It is not a target or a guarantee and may change over time. The lowest category does not mean a risk-free investment. The Compartment offers no capital guarantee or asset protection measures. The Compartment may be exposed to the

following risks which are not adequately captured by the synthetic risk indicator and may negatively impact its value:

- **Operational risk:** losses resulting from human errors, system failures, incorrect valuation and safekeeping of assets.
- **Counterparty risk:** losses occur when a counterparty does not honour its obligations related to contracts such as over-the-counter derivatives.

- **Financial Derivatives risk:** the leverage resulting from derivatives amplifies losses in certain market conditions.
- **Liquidity risk:** markets with low volumes result in difficulties valuing and/or trading some assets.
- **Investments in emerging markets** are generally more sensitive to risk events, such as changes in the economic, political, fiscal and legal environment, as well as fraud.

Further information can be found in the prospectus.

Glossary

Alpha

Alpha shows the percentage performance of a fund above or below that explained by its exposure to the broader market.

Beta

Beta shows the average extent a fund's return moves relative to the broader market. A fund with a beta above 1 moves on average more than the market and below 1 moves on average less than the market.

Order deadline

Deadline for remittance of orders to the transfer agent in Luxembourg as set out in the relevant annexes to the prospectus. You may be required to submit your orders to your financial advisor or fund distributor by an earlier cut-off time.

Conversion fee

Fee paid for the transfer of shares of one unit/share class to another unit/share class.

Correlation

Correlation shows how a fund's return moves in relation to the benchmark. Highly correlated investments tend to move up and down together while this is not true for investments with low correlation.

Standard deviation and annualised volatility

Standard deviation or annualised volatility is a measure of historical volatility. It is calculated by comparing the average return with the average variance from that return.

Inception date

The inception date is the date taken into account for the start of performance calculation. It corresponds to the launch date.

Information ratio

The information ratio is a way of measuring the value added by the portfolio manager relative to a benchmark. It is a measure of the risk-adjusted return of a portfolio and is calculated by dividing the active return (portfolio return minus benchmark return) by the tracking error.

Launch date

The launch date is the date when the sub-fund was activated in its current legal status.

NAV

An acronym of net asset value.

Ongoing charges (OCR)

Ongoing charges are based over 12 months of expenses ending the 31 December of the previous year. It is annually updated, but may be adjusted more frequently. Performance fees and portfolio transaction costs are excluded except in the case of an entry/exit charge paid by the Compartment when buying or selling units/shares in another collective investment undertaking. Estimate of future charges is used for funds younger than 12 months.

Sharpe ratio

The Sharpe ratio shows the fund's risk-adjusted performance. It is calculated by dividing the excess return (portfolio return minus risk free return) by the volatility.

SRRI

The Synthetic Risk and Reward Indicator is a volatility gauge as defined by the European Securities and Markets Authority (ESMA) in its guidelines CESR/10-673.

Tracking error

Tracking error shows the standard deviation of the active returns (portfolio return minus benchmark return). It measures how close a fund return is to its benchmark return.

Important information

For the purposes of this marketing material, "the Fund" means the sub-fund of the fund referred to at the top of page 1 and "the share" designates either "the unit" or "the share", depending on the legal form of the fund. This marketing material is issued by the Fund Management Company, Pictet Asset Management (Europe) S.A., a company authorized and regulated by the Luxembourg regulator "Commission de Surveillance du Secteur Financier". It is neither directed to, nor intended for distribution or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation. The information and data presented in this document are not to be considered as an offer or solicitation to buy, sell or subscribe to any securities or financial instruments or services. It cannot be used as a basis for subscription and does not form part of a contract. The latest version of the fund's prospectus, Key Investor Information Document, annual and semi-annual reports must be read before investing. They are available free of charge in English and in the local language of each country where the compartment is registered, on www.assetmanagement.pictet or in paper copy at Pictet Asset Management (Europe) S.A., 15 avenue J.F. Kennedy, L-1855 Luxembourg, or at the office of the Fund local agent, distributor or centralizing agent if any. In Switzerland, the representative agent is Pictet Asset Management S.A. and the paying agent is Banque Pictet & Cie S.A. Pictet Asset Management (Europe) S.A. has

not taken any steps to ensure that the securities referred to in this document are suitable for any particular investor and this document is not to be relied upon in substitution for the exercise of independent judgment. Tax treatment depends on the individual circumstances of each investor and may be subject to change in the future. Before making any investment decision, investors are recommended to ascertain if this investment is suitable for them in light of their financial knowledge and experience, investment goals and financial situation, or to obtain specific advice from an industry professional. Top 10 holdings do not represent the full portfolio. There is no guarantee that these securities will be held in the future and you should not assume that investment in the securities listed was, or will be profitable. Any reference to a ranking, a rating or an award provides no guarantee for future performance results and is not constant over time. For hedged share classes, only the compartment's consolidation currency is hedged into the share class currency. Foreign exchange exposure, resulting from assets in the portfolio which are not denominated in the consolidation currency, can remain. NAVs relating to dates on which shares are not issued or redeemed ("non-trading NAVs") in your country may be published here. They can only be used for statistical performance measurements and calculations or commission calculations and cannot under any circumstances be used as a basis for subscription or redemption orders. Performance is shown based on the share class NAV per share (in the share class currency) with dividends reinvested (for distributing share classes), including actual ongoing charges, and excluding subscription/redemption fees and taxes borne by the investor. Inflation was not taken into account. As a subscription fee calculation example, if an investor invests EUR 1000 in a fund with a subscription fee of 5%, he will pay to his financial intermediary EUR 47.62 on his investment amount, resulting with a subscribed amount of EUR 952.38 in fund shares. In addition, potential account keeping costs (by your custodian) may reduce the performance. Indices do not include fees or operating expenses and you cannot invest in them.
